

JOYPI EXPANSION SET

Accessories for the RB-JoyPi

The extension set adds 5 more sensors and modules to your experiment case. The required connections are provided by the Port-Doubler board.

The set includes an ADC, a potentiometer, a joystick module, a magnetic sensor, a pressure and temperature sensor, the Port-Doubler board, a breadboard and a cable set.

With the Port-Doubler board, you can now also connect your own projects with the Raspberry and the Joy-Pi, thus extending the range of applications considerably.

MAIN FEATURES

Compatible with	RB-JoyPi, Raspberry Pi
Special features	ADC for connecting analog sensors
Scope of delivery	Port-Doubler board, Joy-Stick module, ADC, pressure and temperature sensor, potentiometer, magnetic sensor, cable set, bread-board

FURTHER SPECIFICATION

ADC	4-channel 12-bit accuracy (ADS1115)
Potentiometer	10 k Ω
Magnetic sensor	Linear magnetic Hall sensor (49E)
Pressure and temperature sensor	BMP280
Joystick	Analog 2-axis joystick module with button

FURTHER DETAILS

Article No.	RB-JoyPi-Addon
EAN:	4250236820965
Customs tariff No.	8473308000
